

AIRCON MACHINE

VTAC36

This machine was designed to recover residual refrigerant from the A/C system. As many impurities can cause undesirable effects, such as: high temperature, reduced refrigerant effect, leakage, and more.

Product Specification

Refrigerant	R134a
Refrigerant	180 – 350 g/min
Recharge speed	800 -1500 g/min
Vacuum speed	60 L/min
Refrigerant tank capacity	10Kg
Electronic scale range	0-35 kg
Oil bottle capacity	300 mL
Operating temperature	5 – 50°C
Voltage	AC 220v/50hz/1ph
Max. working pressure	17.5 bar
Low pressure protection	<1 bar
Electronic scale precision	± 10g

Able to drain and collect the used oil to the oil tray

Convenient to observe the oil level of the vacuum pump

Big caster better fits for the uneven ground
Printer functionality
